

Erevna

Inspiring students to do more.

Our Mission

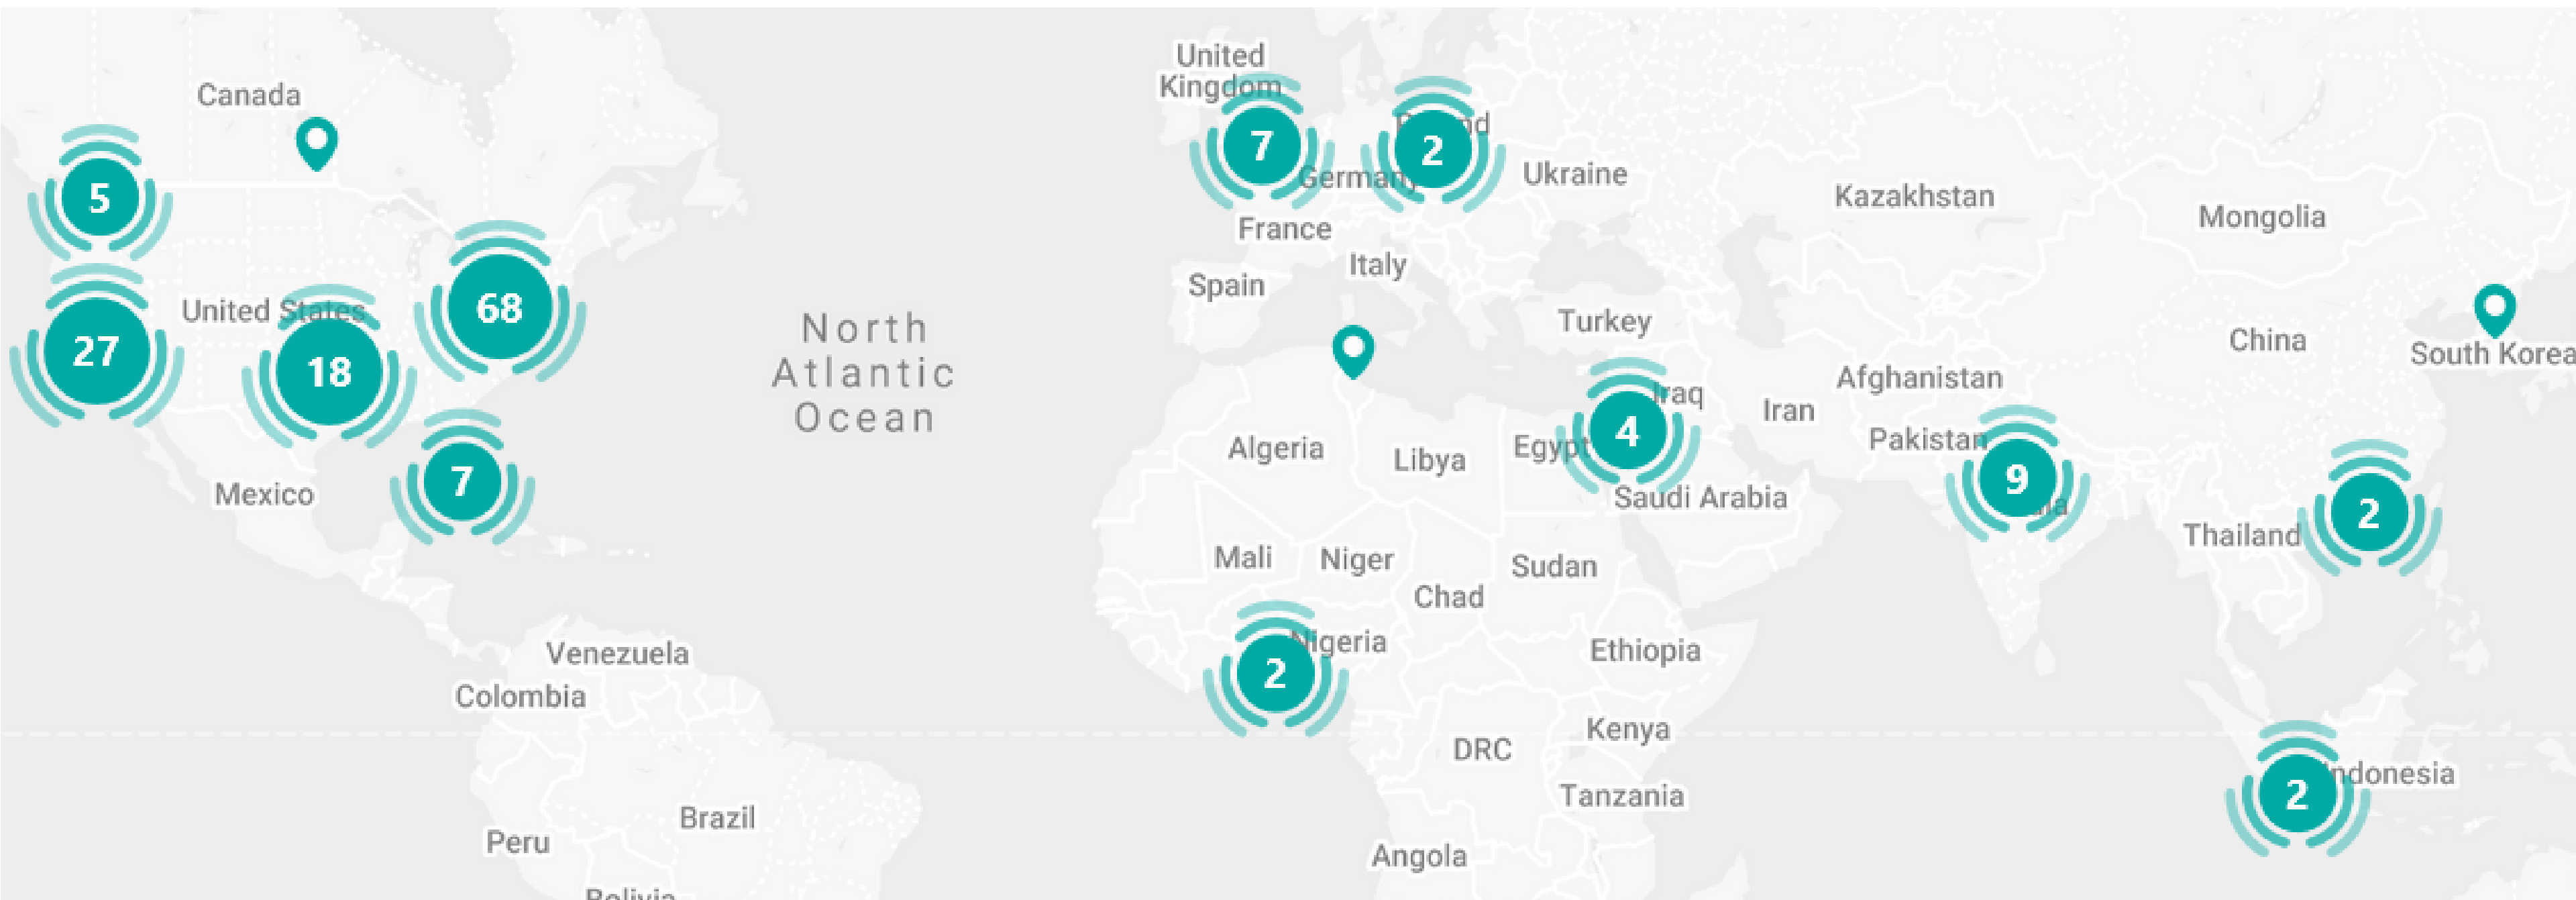

We help student innovators translate their ideas into **impact**.

Who We Are

A **wholesome** and **inclusive** nonprofit of over 1,000 students across 20+ different time zones.

How We Do It

We seek to inspire and help student innovators pursue their ideas through the following core parts to our organization:

1

Incubation

We provide structure, passionate students in our network, and a collection of resources for students to pursue ideas, projects, or independent research studies.

2

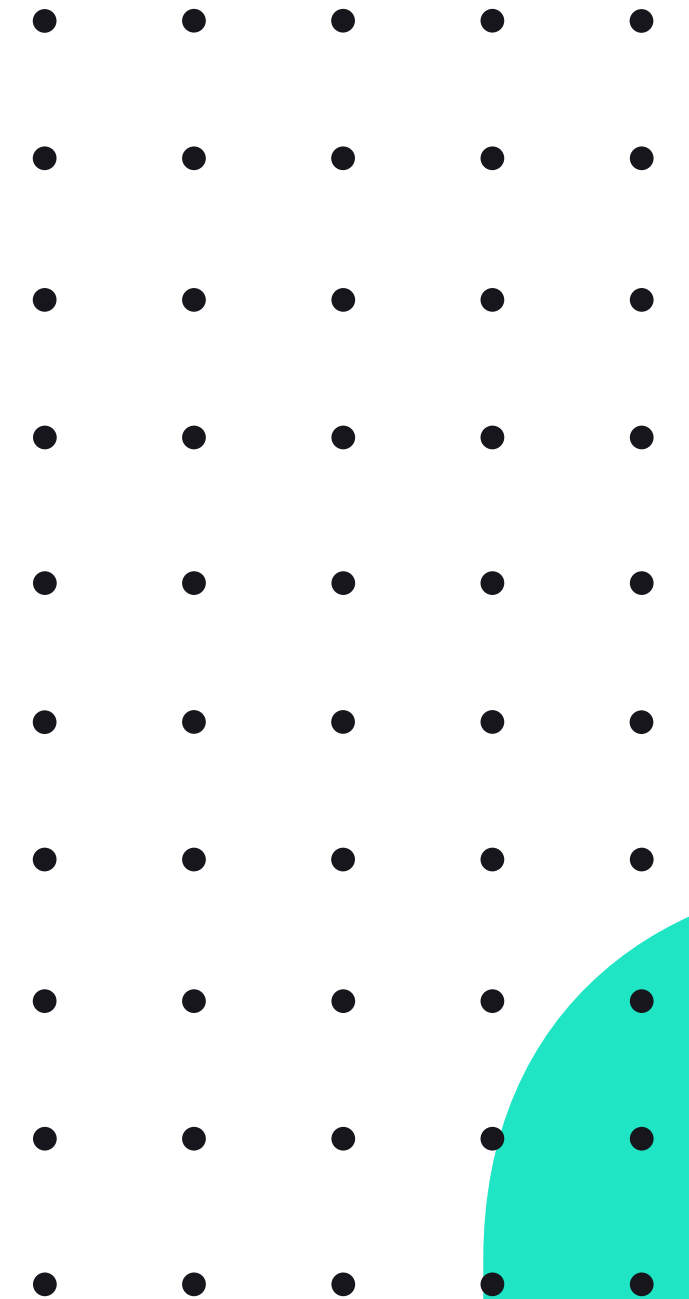

Research

We focus on making research more equitable and accessible for students by providing them with opportunities to conduct independent research to discover solutions and connect with relevant academic organizations and faculty.

3

Connections/Consulting

We support projects and initiatives with connections, provide advice and assistance, and seek to ensure all of our work can see actionable results and implementation.

Our Initiatives

**Panel to the
People**

**Intercollegiate
Discord**

Our Partners

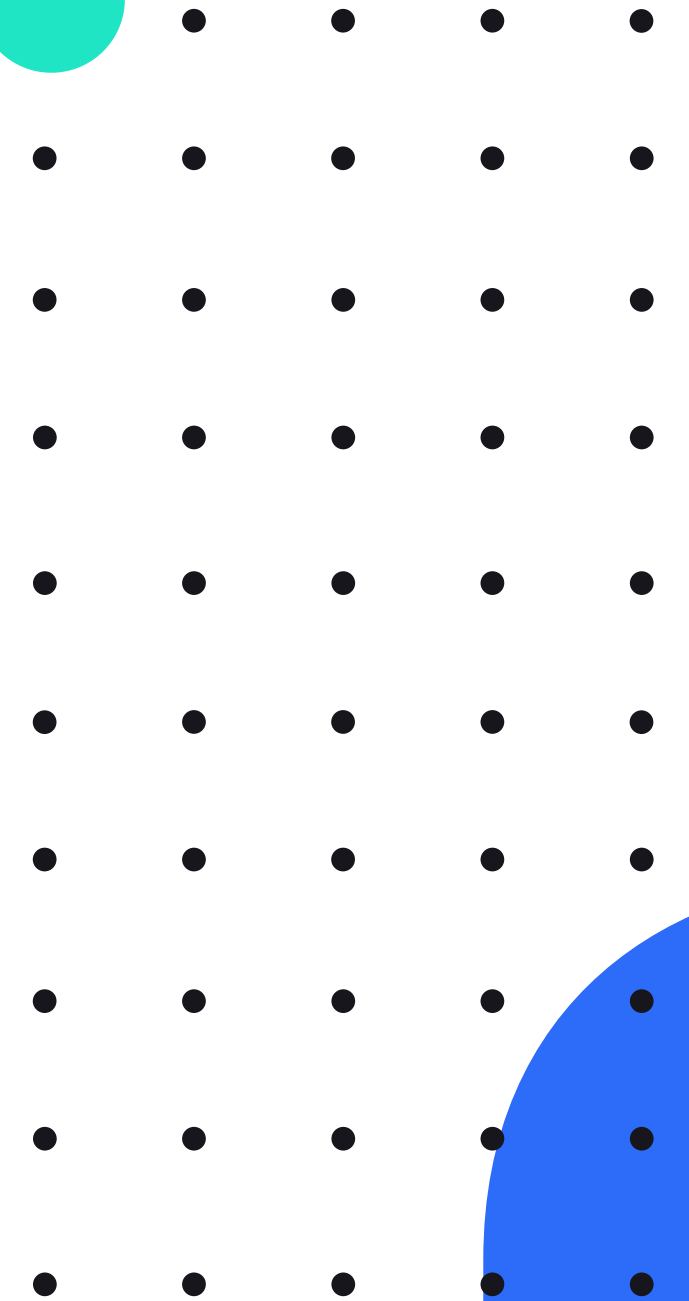

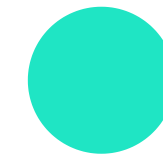

- ClinicianWiki
- Dcyphr
- SupplyCrate
- Simply Neuroscience
- The Mentorship Project
- GroundBreakers
- Harvard Center for Geographic Analysis
- Harvard Data Science Initiative
- Just One Giant Lab (JOGL)
- MIT Innovation Initiative
- Georgia Tech College of Computing
- COVID Foundation
- CovED
- Harvard Innovation Labs
- Harvard Political Review

Our Accomplishments

- [1k+ active members](#) across CVT and CVC
- Coordinated the donation of [350k+](#) articles of PPE through SupplyCrate
- Connected [30 students](#) with research opportunities at Harvard institutes, centers, and programs
- Created visualizations to [inform](#) NYC Borough Presidents and helped coordinate [\\$600k](#) in PPE donations

How We Will Use Funding

- Policy for the People: the Pandemic Policython grants
- Stipends for low-income students across our initiatives
- Online REU Research Assistant funding

Our Value

We seek to make an impact through student-led innovation. Our **value** lies within the success we have in helping students transition their ideation and implementing it into **real-world impactful solutions** (i.e data visualizations, research briefs, policy proposals, etc.).
